Fire Protection Systems Agreement

Your building project had been submitted to the CITY OF OLATHE for plan review. It has been noted that the building either has an existing fire alarm and /or sprinkler system or plans to install one. Please review the following stipulations and have all parties sign the agreement. Your permit will not be issued until the agreement is received by this office using the contact information shown above.

- Fire alarm drawings are to be submitted prior to installation of required devices.
- Fire sprinkler drawings are to be submitted prior to installation of required devices.
- A copy of the fire alarm record of completion is to be on site at final inspection to ensure that the system has been tested by a fire alarm company.
- If you receive comments from the fire department stating to submit fire alarm and/or sprinkler plans, they are to be submitted unless told otherwise by the fire plans examiner.
- Fire alarms are to be UL certificated.

By signing below, the signing parties agree to follow this agreement and understand that if the agreement is not followed, final occupancy for your project will not be granted.
