### INCIDENT DESCRIPTION

## FIRE DEVASTATES HOME

An early morning fire destroyed a more than 4,000 square foot home near Woodland and K10. Severe compromise of the home's structure and extreme fire conditions met firefighters when they arrived. These circumstances prompted firefighters to fight the blaze from outside the home.

Firefighters have already salvaged some family pictures and are working to recover more sentimental items from the home. The home's owners are out of town and will arrive in Olathe late today.

A private alarm company reported the fire.

Olathe fire investigators are working to determine the fire's cause.

"Even though no one was home this morning, every fire reminds us to test our smoke alarms and review our fire escape plan," said Division Chief Brad Henson.
