

Tips on How to use the Burial Record Search

Search Options:

By Last Name: If you don't know the correct spelling, simply enter the first two or three letters of the name to access a comprehensive list of burials with last names beginning with those letters.

By Veteran: By changing the Veteran dropdown to "Yes" the results will show all records marked as veterans within the cemetery. Using the Last Name with the Veteran field checked will narrow the search results.

By Owner information: You can search for burials by owner first and last names. A search using the owner name will return all spaces owned by that person, even if there are no burials in those spaces.

By Year of Burial: You can search by year of burial by entering the desired year into the Year of Interment box. This search will give a list of all burials made within that year.

Once you find the record you are searching for, simply click on the name to view the record.

NOTE: The burial location is a reference to where that burial resides within the cemetery.

(Example: 1, 32, 1, W2 – Refers to 1st Addition, Block 32, Lot 1, Space W2)

(Example: 2, 2, 234, S1 – Refers to 2nd Addition, Block 2, Lot 234, Space S1)

First and Second additions are separated by Governors Rd. on the map, with First Addition being North and 2nd Addition being South.

How to use the Map Function:

1. Click on the "View GIS Map" key and the map will appear with a bubble showing the location of that burial.
2. To zoom in or out, click on the + or – icon and then click and hold your left mouse button while drawing a rectangle around the area you are inquiring about.
3. If you would like to see the entire map, click on the "zoom to full extent" icon.
4. When zoomed in, you can move the map around using the pan icon.
5. Using the measure icon allows you to measure distances from one area to another.
6. To measure another location, use the "clear measure info" icon before measuring again.
7. You can print sections of the map by zooming in on the desired section and using the printer icon.

NOTE: When zooming in, Block numbers will appear. As you zoom in closer, Lot numbers will appear. This allows you to know the location of the burial within the cemetery by referencing that information in the record.

As you zoom in very close, you will see that the spaces are labeled. You have the option of which label that you want shown by using the drop-down menu next to the “Label” icon.
