Know Your Watershed

We all live in a watershed; do you know yours? A watershed is the land area that drains to a common body of water, such as a creek, stream, river, or lake. In Olathe, and the Kansas City area, all water drains to the Missouri River, and eventually reaches the Gulf of Mexico.

The map below shows all of the watersheds in Olathe, which include:

- Kill Creek
- Cedar Creek
- Mill Creek
- Indian Creek
- Tomahawk Creek
- Blue River
- Little Bull Creek
